10

5

1. (Currently Amended) A data recording and reproducing apparatus having a function of reproducing audio data and image data associated with the audio data, said apparatus comprising:

audio data reproducing means for reproducing audio data; and display means for displaying, while the audio data reproducing means is reproducing the audio data, first information including character data representing at least an elapsed reproduction time of the audio data being reproduced as information of a reproduction status of the audio data, and for displaying second information including image data associated with the audio data being reproduced.

2. (Currently Amended) A data recording and reproducing apparatus comprising:

audio data reproducing means for reproducing selected audio data;

display means for displaying at least image data associated with the selected audio data;

instruction means for instructing whether to display the image data with the display means when the audio data reproducing means reproduces the audio data; and

Customer No. 01933

- control means for causing the display means to display character data representing at least an elapsed reproduction time of the audio data being reproduced as information of a reproduction status of the audio data, when the instruction means instructs the display means not to display the image data.
  - 3. (Currently Amended) The apparatus according to claim 2, wherein the control means causes the display means to display the <u>information of the</u> reproduction status of the audio data after displaying the image data for a predetermined time, when the instruction means instructs the display means to display the image data.

Claim 4 (Canceled).

- elapsed reproduction time of the audio data being reproduced as information of a reproduction status of the audio data while the audio data is being reproduced, and for displaying second information including the image data associated with said part of the audio data, when said part of the audio data is reproduced.
  - 6. (Previously Presented) The apparatus according to claim 5, wherein every time said part of the audio data is reproduced, said control means causes the display means to display the second information for a predetermined time and then to display the first information upon lapse of the predetermined time.
  - 7. (Previously Presented) A data recording and reproducing apparatus having a function of recording audio data and image data associated with the audio data, said apparatus comprising:

audio data recording means for recording audio data; and imaging means for recording image data in association with a time elapsed during recording of the audio data, while the audio data recording means is recording the audio data.

8. (Currently Amended) A data recording and reproducing apparatus having a function of recording audio data and image data associated with the audio data, said apparatus comprising:

Customer No. 01933

display means for displaying, while the audio data reproducing means is reproducing the audio data, first information including character data representing at least an elapsed reproduction time of the audio data being reproduced as information of a reproduction status of the audio data, and for displaying second information including image data associated with a time elapsed during recording of the audio data that the audio data reproducing means is reproducing.

9. (Currently Amended) The apparatus according to claim 8, wherein every time the time elapsed during the recording of the audio data is detected, the display means displays the image data for a predetermined time and then displays the character data representing information of the reproduction status of the audio data.

Claims 10-16 (Canceled).
